

CODE ESCAPE TOGETHER

Daniel Rozentsvaig • Elias Farah
Advisor: Dr. Moshe Sulamy

THE PROBLEM

PROGRAMMING FEELS ABSTRACT

Traditional methods fail to engage beginner programmers.

THE SOLUTION

ESCAPE ROOMS + VISUAL PROGRAMMING

A 2-player co-op escape room game with visual programming.

GAMEPLAY

The players enter a room with hints scattered around, they have to use them together with visual programming to escape the room.

THE LOBBY

CHOOSE A NICKNAME AND CUSTOMIZE PLAYER FACE

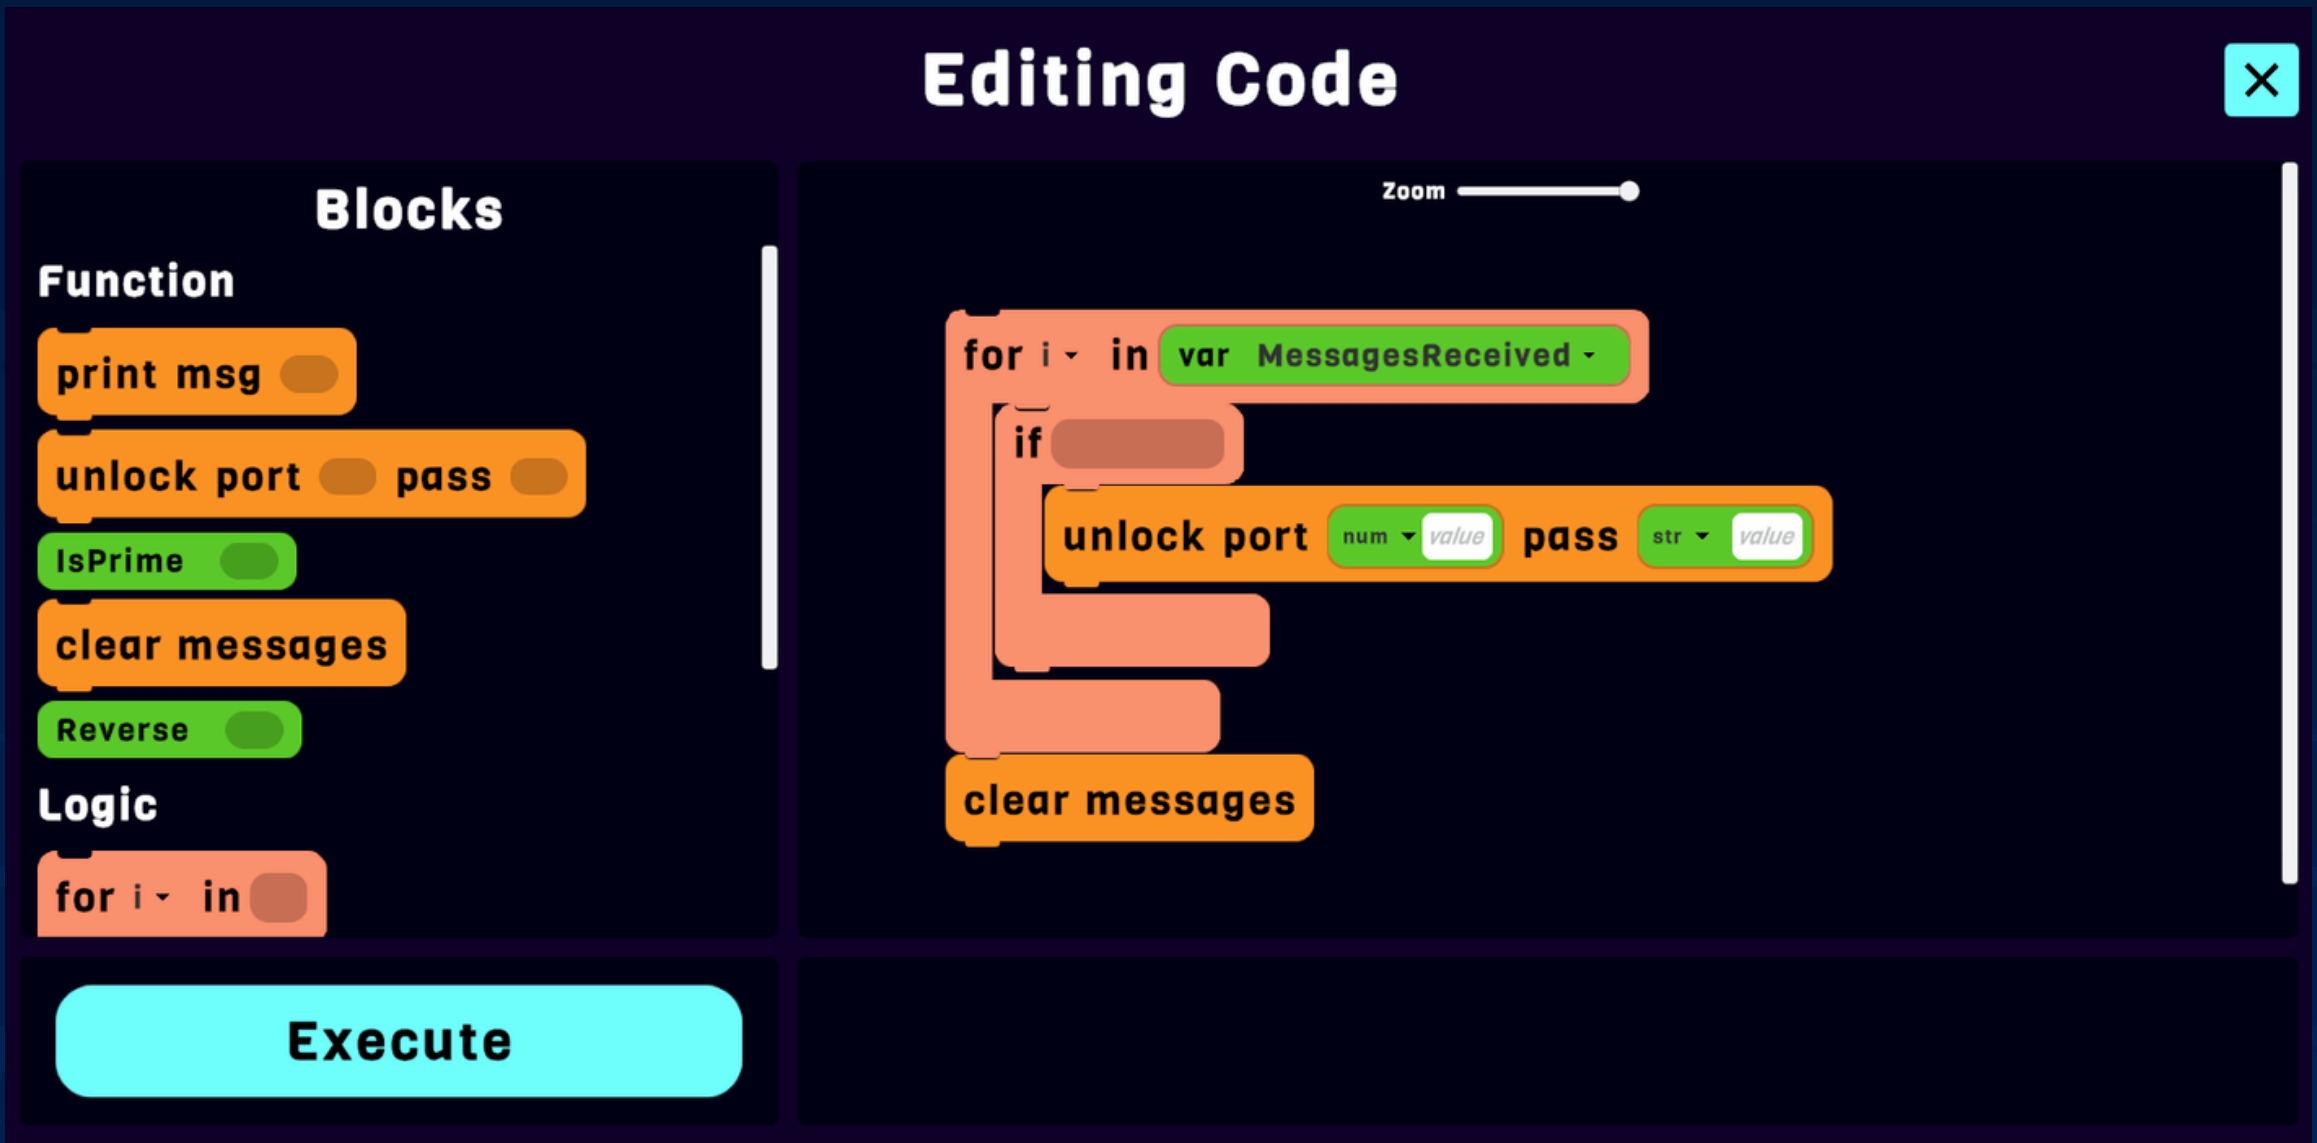

EXAMPLE LEVEL

1 OF 4 LEVELS IN THE GAME, EACH WITH THEIR OWN TWIST

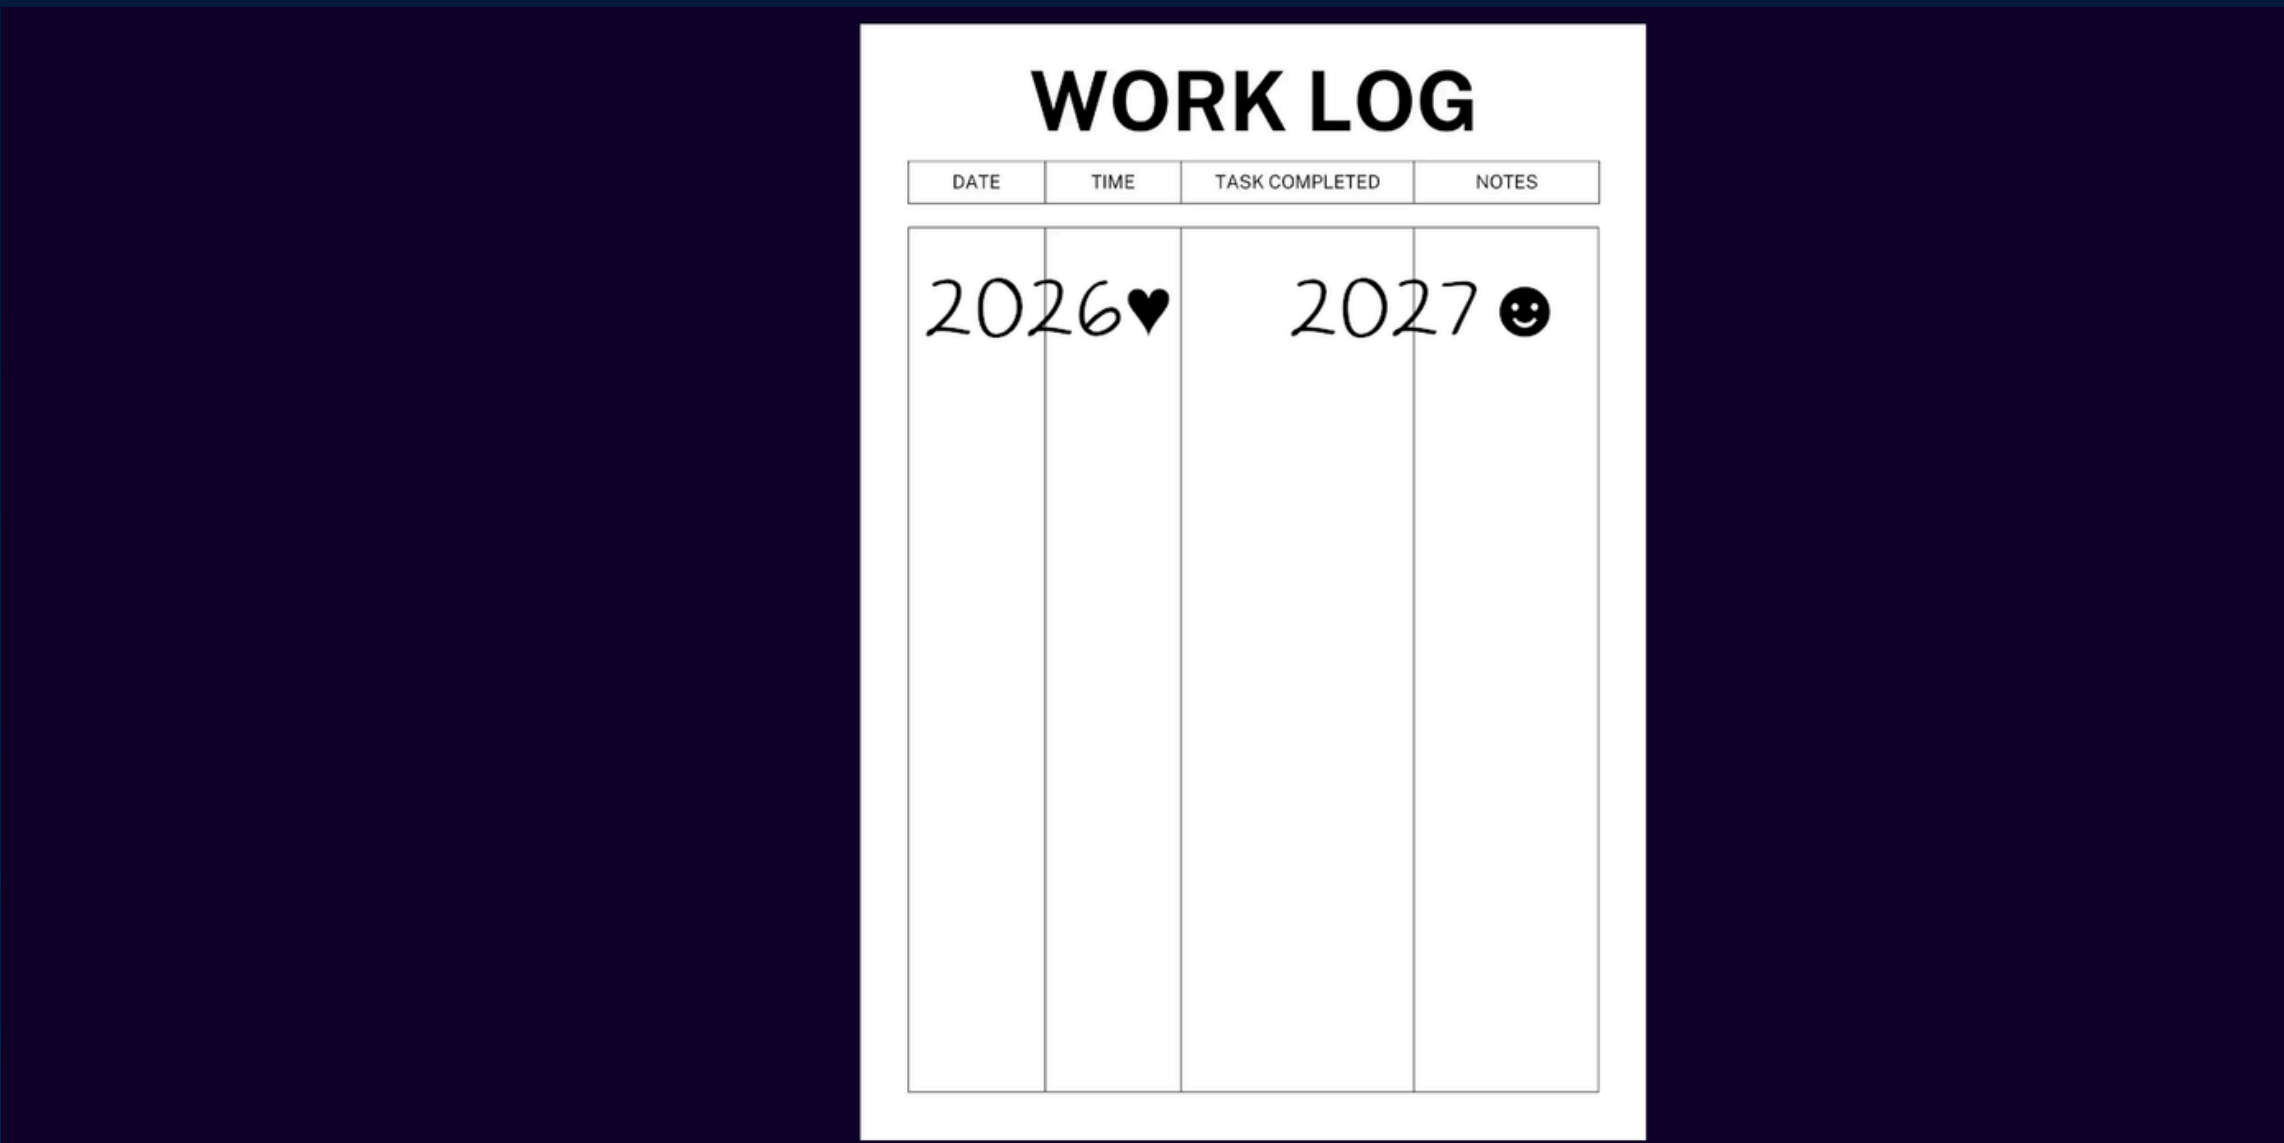

VPL SCREEN

SOLVE PUZZLES USING VISUAL PROGRAMMING

HINTS

FIND HINTS TO SOLVE PUZZLES

KEY FEATURES

LAN MULTIPLAYER

PC hosts, two phones connect via a local dedicated server. No external server needed, low latency.

CO-OP REQUIRED

Levels are designed so players cannot progress alone, teamwork is the driving force of the game.

VISUAL PROGRAMMING

Drag & drop blocks. Inspired by Scratch & Blockly. Logic, not syntax.

TECHNOLOGIES USED

unity
